DETAILED ACTION

Claim Objections

- 1) Claims 1-4, 8-10 and 12-18 are objected to because of the following informalities:
Claim 9 line 2, "the existence" should be --an existence--;

Claim Rejections - 35 USC § 102

- 2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 3) Claims 1-4, 8-10 and 12-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Reinecke (4260199).

In re claims 1, 3, 8-10, and 12-13, Reinecke provides a method of controlling a braking function of a vehicle with a first brake circuit (24) associated with driven wheels and a second braking circuit (26) associated with non-driven wheels, the method comprising the steps of: sensing a vehicle condition for which braking of the driven wheels is desired (col. 2 lines 17-24) independently of operator demand; in response to the sensing step, electrically actuating a dual brake valve (32, 33) to direct braking pressure to the first and second braking circuit; and controlling a plurality of modulators (12, 14) to inhibit delivery of braking pressure to the non-driven wheels. See col. 3 lines 30-40

IN re claims 2 and 16, see sol. 2 lines 36-40.

In re claims 4 and 14, see element 30.

In re claims 15 and 17-18, see the rejection of claims 1, 4 and 8 above.

Response to Arguments

4) Applicant's arguments filed 11/3/05 have been fully considered but they are not persuasive. Applicant argues that that col. 3 lines 31-45 do not provide an exclamation of how the brake valve 6 provides an ATC function. Further, applicant argues that the brake valve 6 is not electrically operated. Please note that inherently, in the embodiment cited in col. 3 lines 31-45, the brake valve would have to be electrically operated.

Conclusion

5) **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
